

Shallow Water Fleet Manager

REPORTS TO: Marine Manager (based in Houston)
CONTRACT: CDD – (6 months contract)
LOCATION: Massy, France
CONTACT: recruit@sbgs.com

JOB PROFILE

Reporting to the Marine Manager, the Shallow Water Fleet Manager is responsible for the Seabed Geosolutions fleet, consisting of 35 vessels of less than 24 meters length working worldwide.

He/she keeps valid flag, classification and insurance certification, acting as point of contact for administrations and operations, and coordinating all mandatory surveys on site.

He/she represents the technical support for all marine equipment during the project, but also mobilization and demobilization phases. He/she must ensure ships are in operational condition, and preventive maintenance respected according the CMMS software TM Master. He/she realizes technical audits and also technical specifications for technical stops; then coordinates the work with sub-contractors.

He/she manages all technical studies in cooperation with the naval architects but also administration (flag & class).

He/she must also ensure the QHSE rules are fulfilled, and adequate training is provided to the end users.

REQUIRED EDUCATION, SKILLS & EXPERIENCE

The Shallow Water Fleet Manager must be autonomous, experienced in project management, with excellent organizational and very good relationship skills.

Education & Skills:

- Merchant marine officer or equivalent, preferably with Deck and Engine certification
- Knowledge of French, class and international marine rules
- Technical knowledge of marine equipment
- Use of CMMS software (like TM Master, AMOS)
- Use of CAD 2D software (like Auto CAD)

Experience:

- At least 2 years on board vessels (of small size)
- At least 2 years as a sedentary position in a maritime or offshore company
- Experience and knowledge of offshore oil & gas domain, seismic if possible
- Experience in naval shipbuilding or ship repair yard would be appreciated

LANGUAGES

Fluent French and English languages imperative - spoken and written (including maritime technical).

BUSINESS TRAVEL REQUIREMENTS

The Shallow Water Fleet Manager must travel worldwide in order to realize technical audits, repairs or modification if necessary.
